Attn: Hiring Manager,

In his book "*The Lean Startup*", Eric Ries describes "...startup success can be engineered by following the process, which means it can be learned, which means it can be taught."

I lived this process a few times. I have the drive to *do what it takes to get the job done*. I am the right fit for your **Project Manager** role. In fact, this position is a perfect fit for my diverse background.

I'm a Swiss Army Knife of complementary disciplines that cut across an organization related to innovation. I am passionate about these key practice areas and conversant with the teams in all.

- » Project Management
- » Business Strategy
- » User Experience
- » Product Creation
- » Technology
- » Agile Development
- » Sales & Marketing

With 17+ years of user experience, project, and product management experience in both enterprise and start up environments, I have a proven track record of managing agile teams, building companies, and understanding what makes startups tick.

I look forward to deeper conversation about the specifics of this exciting role within your organization.

Take care,

Daniel Stouffer
